John Wick

Final validation for HTML - one warning left for <section> to be given a title, since I didn't want a title in that area I ignored it.
Final validation for CSS- No error.

Hi JJ,

It is ok to have warning while validating HTML.
Here I am attaching my Feedback for the Project done.

—> Very well structured layout. (Output on Desktop, Tablet and Mobile)
—> Good use of HTML Symbols and other HTML Elements.
—> Good use of all different CSS properties like;
     transition, box-shadow, border-radius, opacity, linear gradient for background, filter, grid-template-columns.
—> Well documented HTML and CSS Page.
